The MSMC must demonstrate through analysis and documentation that the options it develops are expected to meet the NE Multispecies FMP goals and objectives. The MSMC may review the performance of different user groups or fleet sectors in developing options. The range of options developed by the MSMC may include any of the management measures in the NE Multispecies FMP, including, but not limited to: Annual target TACs, which must be based on the projected fishing mortality levels required to meet the goals and objectives outlined in the NE Multispecies FMP for the 10 regulated species; DAS changes; possession limits; gear restrictions; closed areas; permitting restrictions; minimum fish sizes; recreational fishing measures; and any other management measures currently included in the NE Multispecies FMP.

(3) The NEFMC shall review the recommended target TACs and all of the options developed by the MSMC and other relevant information, consider public comment, and develop a recommendation to meet the NE Multispecies FMP objective that is consistent with the other applicable law. If the NEFMC does not submit a recommendation that meets the NE Multispecies FMP objectives and is consistent with other applicable law, the Regional Administrator may adopt any option developed by the MSMC, unless rejected by the NEFMC, as specified in paragraph (a)(6) of this section, provided the option meets the NE Multispecies FMP objective and is consistent with other applicable law.
